Condition: Understanding
and Treating Atopic
Dermatitis**

DATE: Friday, August 16, 2019

TIME: 5:00 pm – 7:30 pm

**LOCATION: Wyndham Grand
Chicago Riverfront**

Grand Ballroom C & D
71 E Wacker Dr.
Chicago, IL 60601

Learning Objectives

At the conclusion of this session, you will be able to:

- Describe the “atopic march” in AD and how this feature of AD should inform treatment strategies
- Discuss the effects of uncontrolled AD disease burden on various aspects of patient life
- Outline aspects of guideline recommendations for the management of AD that may be less known to some clinicians
- Characterize the elements of dysbiosis of the skin that have been currently identified
- Identify important features of moisturizers that will be most effective in the treatment of AD
- Summarize efficacy and safety data for biologics and small molecule inhibitory agents that are available for the treatment of AD
